

Master Guide: Reporting Technical Milestones (Past Simple vs Present Perfect)

Bahasa Inggris 1 • Pertemuan 3

BAB 1. THE BIG PICTURE: PAST SIMPLE VS PRESENT PERFECT IN ENGINEERING REPORTS

In technical sprint retrospectives, incident postmortems, and academic research papers, choosing between the **Past Simple** and the **Present Perfect** communicates critical temporal nuances about system states:

Dimension	Past Simple Tense	Present Perfect Tense
Formula	Subject + Verb 2 (ed / irregular)	Subject + have/has + Verb 3 (Past Participle)
Temporal Focus	Completed action at a specific, closed past timestamp .	Action happened at an unspecified time , or extends into the present with ongoing operational relevance.
Time Signal Words	yesterday, last week, in 2024, two hours ago, during sprint 3	already, yet, just, recently, so far, since Monday, for three hours
IT Engineering Example	"The DBA restored the database backup yesterday at 22:00 ."	"The team has resolved 45 production tickets so far this month."

BAB 2. REGULAR VS IRREGULAR VERB CONJUGATIONS IN SOFTWARE ENGINEERING

Base Form (V1)	Past Simple (V2)	Past Participle (V3)	Contextual Computing Usage
compile	compiled	compiled	"The compiler has successfully generated the machine code."
build	built	built	"The CI/CD pipeline built the release artifact last night."
run	ran	run	"We ran the integration test suite on the staging server."
write	wrote	written	"The engineer has written comprehensive unit test mocks."
find	found	found	"The penetration tester found two critical SQL injection flaws."
