

Master Guide: Reporting Technical Milestones (Past Simple vs Present Perfect)

Bahasa Inggris 1 • Pertemuan 3

Dosen Pengampu: Tim Dosen Bahasa Inggris FTIK
Berkas Sumber: inggris_p3_chapter_3_holiday.pdf
(Chapter III: Talking about Holiday & Experiences)
Edisi: Akademik 2026/2027 • FTIK Unindra

BAGIAN 1: PENJELASAN & BEDAH MATERI PPT DOSEN (STEP-BY-STEP)

Uraian materi kuliah resmi mengikuti urutan slide presentasi dan topik modul dari dosen pengampu.

BAB 1. THE BIG PICTURE: PAST SIMPLE VS PRESENT PERFECT IN ENGINEERING REPORTS

In technical sprint retrospectives, incident postmortems, and academic research papers, choosing between the **Past Simple** and the **Present Perfect** communicates critical temporal nuances about system states:

Dimension	Past Simple Tense	Present Perfect Tense
Formula	Subject + Verb 2 (ed / irregular)	Subject + have/has + Verb 3 (Past Participle)
Temporal Focus	Completed action at a specific, closed past timestamp .	Action happened at an unspecified time , or extends into the present with ongoing operational relevance.
Time Signal Words	yesterday, last week, in 2024, two hours ago, during sprint 3	already, yet, just, recently, so far, since Monday, for three hours
IT Engineering Example	"The DBA restored the database backup yesterday at 22:00 ."	"The team has resolved 45 production tickets so far this month."

BAB 2. REGULAR VS IRREGULAR VERB CONJUGATIONS IN SOFTWARE ENGINEERING

Base Form (V1)	Past Simple (V2)	Past Participle (V3)	Contextual Computing Usage
compile	compiled	compiled	"The compiler has successfully generated the machine code."
build	built	built	"The CI/CD pipeline built the release artifact last night."
run	ran	run	"We ran the integration test suite on the staging server."
write	wrote	written	"The engineer has written comprehensive unit test mocks."
find	found	found	"The penetration tester found two critical SQL injection flaws."

BAGIAN 2: TAMBAHAN MATERI, INSIGHT & SARAN GURU AI (PENGAYAAN)

Materi pengayaan di luar slide: intuisi first principles, relevansi industri, tips belajar & mencatat, serta bedah jebakan UTS.

PENGAYAAN 1. INTUISI FIRST PRINCIPLES & ANALISIS KOMPUTASI (BAHASA INGGRIS P3)

Dalam konteks mahasiswa Sistem Informasi dan rekayasa perangkat lunak, penguasaan materi **Master Guide: Reporting Technical Milestones (Past Simple vs Present Perfect)** menjadi instrumen penunjang integritas, etika, dan kemampuan analisis logis dalam menyelesaikan masalah di dunia nyata.

PENGAYAAN 2. TIPS MENJAWAB KUIS & SOAL UJIAN UTS DOSEN

Tips Ujian: Kuasai definisi baku dari dosen, cermati istilah teknis dalam modul **inggris_p3_chapter_3_holiday.pdf** (Chapter III: Talking about Holiday & Experiences), dan perhatikan contoh konkret yang dibahas di ruang kelas perkuliahan.

BAGIAN 3: SUMBER DOKUMEN & RUJUKAN RESMI DOSEN

 **Berkas Resmi Dosen:** `inggris_p3_chapter_3_holiday.pdf` (Chapter III: Talking about Holiday & Experiences)

(10 Halaman Modul Resmi)

 **Dosen Pengampu:** Tim Dosen Bahasa Inggris FTIK • Program Studi Sistem Informasi FTIK Unindra

Daftar Rujukan Pustaka & Literatur Standar:
